THE MARKET IN ENGLAND

AMERICAN WHEELS WERE HANDI-CAPPED BY AUCTION SALES.

Scorehing Yesterday-Bieyele News and Notes.

Indianapolis has become a center for the manufacture of bicycles from which wheels are shipped to all parts of the world. Not only is the largest factory in the world here, but the combined output of wheels, which are manufactured to be sold upon the reputation of their makers and not upon the name which any purchaser sees fit to tack upon them, is larger than that of any other city. The bicycles manufactured here have already acquired fame abroad and now several local manufacturers are giving the foreign trade a large share of their attention. It is interesting to read what a leading English paper ha to say recently regarding the American wheel. It contained the following article "If there is one subject more than another that people in the cycle trade and out of it, are concerned about, it is the problem that surrounds the future of the American wheel in this country. Ordinary discussions convey the idea to the average man on the street that comparison between the two classes of machines—the English and Amercan-places the latter in a disadvantageous light, not because the design is faulty or the mechanism inferior, but rather because the general tout ensemble of an American machine forbids the probability or even possibility of its becoming, on this side of

'In spite of frantic appeals, some based on patriotism, others apparently on prejucyclists have not lost their heads over the matter, but have reasoned the question out with British tact, calmness and propriety. And what have they resolved? That the outlook for '97 is not a brilliant on for the American wheel. Why should th outlook be gloomy? The field here is large and the market is broad, wide, expansive what is offered for sale is good, there is no reason for suggesting that buyers will pass men is deeper than the desire to get the more of a democratic than a conservative age, and if democracy have any meaning at all it will preserve an equality be bleyele and bleyele. It has been urged that the American wheel is not strong enough our English roads, but it has been proved that this assertion is fallacious. One has only to go the round of American depots in London and gather from the references particulars and the number of repairs as against the number of machines sold and he will be astonished at the extremely

low percentage of American wheels that have had to go to the repair shop. "If American machines be given a fall chance they will stand alongside their rivals; but how is the prejudice against them to be overcome? In London, perhaps, this prejudice is infinitesimal compared with the provinces. It is astonishing, but neverertheless true, that in the country, where the air is freed from the feverish breath of those fighting and struggling for a place in the great competitive market of London, there is also a total absence of anything like good favor or good will toward Amercan bicycles. Is it prejudice, or only fear of failure, because the people are not educated in the knowledge of what an American machine is like? The key of the situation is in the hands of agents, and this industrious body assert that 'they daren' tackle American bicycles,' and proceed to rive their reasons. A sort of panic seized them when big parcels of 'American ma chines' found their way to auctioneers depots all over the country, and knocked down for ridiculous sums, stunting the growth of the legitimate trade. Unfortunately those wheels were of inferior make, and they brought in their train wheels. But prejudice is short lived, and we opine that so far as the future of the prejudice against it will have become dead ere we have entered into the full swing of

"WORKED" THE CROWD. Henry Kothe's Little Joke on the

the season of '97."

Firm's Employes. Henry Kothe, secretary of the Marion Trust Company, is enjoying a good joke on some of his associates who are wheel riders. Tuesday afternoon he made the remark that he believed he would buy a bicycle. He was known formerly as a man who

cared nothing for the wheel, and had been & Grande Bicycles at known to make remarks which led his friends to believe that he was opposed to buy a wheel caused the others to become interested, and they began to "guy" him in his expense Mr. Kothe declared he was | 3 willing to wager that he could mount a wheel and ride it off as soon as he took it from the store. Somebody had insinuated that he would better buy a "sod cutter" to learn on, as he would break up two or three good wheels learning. The challenge of Mr. Kothe to bet that he could mount and ride off was eagerly acrepted. Everybody wanted some of the good thing," but Mr. Kothe wanted to make it a mild wager. He was willing to bet the expense of an evening of joid y-just | & a few refreshments and perhaps a little supper later on. Everything was arranged and the crowd went over to the store of groomsman and Miss Nan Bryan brides- Mueller & Watson after office hours. After of various wheels shown Mr. Kothe selected | X one. He rolled it out to the curb, and the crowd followed, and everyone was prepared "give him the laugh" when he should fall off. > Mr. Kothe's success is easily explained. He had slipped over to the store quietly Saturday and purchased the wheel and William Beaning had taught him to ride it Sunday morning. A little practice Monday morning and Monday evening and again Tuesday morning had given him confidence. When he took the crowd over to the store Tuesday afternoon he simply picked out his own wheel and was able to ride it easily. ride it easily.

ARRESTED FOR "SCORCHING." Bicycle Dealer and Messenger Gath-

ered In by a "Bike Cop." Jap Clemens, a bicycle dealer, was arrested yesterday for riding faster than the law allows. He was riding a tandem with another man and happened to get in the bailiwick of "Bike Cop" Holz, who was watching for scorchers on North Meridian street. Holz tried to overtake the tandem, but the riders of the machine rode on unconscious of his exertion. Holz, however, recognized Clemens and went to his store and arrested him. Clemens says he may have been going pretty fast, but he did not realize it, the wheel worked so easily. Holz and the other policemen are hard after the scorchers. Wherever they can be captured they will be sent in to the police station and when recognized warrants will be obtained for their arrest. Holz also arrested Clarence McClain, a messenger boy, yesterday for scorching. In all cases where the bicycle laws are violated the police have instructions to treat the violators same as violators of other ordinances. They must be sent to the police station in the regular way. This means a ride in the patrol wagon unless that vehicle is overworked. It has been suggested by a wheelwill give a reception in the Philokurian man that the Chicago plan might be Hall on Friday evening. There, when a policeman catches a scorcher of a person riding without a light or license, he arrests the wheel, not the person. He takes the wheel, sends it to the police station, takes the name of the person and if the latter does not appear in Police Court to answer to the charge the wheel is forfeited.

MEMORIAL DAY.

Order of Mrs. Hitt, National President of the Relief Corps.

The Memorial day order of Mrs. Agnes Hitt, national president of the Woman's Relief Corps, auxiliary of the Grand Army of the Republic, was mailed yesterday by Mrs. Ida S. McBride, national secretary. The main features are as follows:

Swiftly our brave battalions are marching over the border-land and into the shadows gray. Since last Memorial day the kindly mother we call "Death" has folded her mantle about more than seven thousand of those who were then with us. Battle-scarred and weary, they have bivouacked in her arms. Icy fingers touched forest and field, and the shadow of death came over
